Restriction to one of the following inventions is required.

I. Claims 19-26 drawn to an assembly with resilient elements, and steps of use of the device, class 439.

II. Claims 27-32 drawn to a method of forming resilient spring contacts, class 438.

The inventions are distinct from each other because.

Inventions ~~// and I~~ ~~and prompt for the appropriate information, value = \*\*~~ are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article could be formed with springs of laminated parts without a coating step.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2839

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
